PROFESSIONAL SUMMARY

FullStack Developer focused on **transaction-safe systems, concurrency control and secure API design. UI/Ux design**
Experienced in building **production-grade payment and authentication systems** using **Node.js, Express, MongoDB, MySQL, and Docker.**

PROJECTS

MadadKart — NGO Resource & Volunteer Coordination Platform | Next.js, MongoDB, Leaflet, cloudinary

- Developed scalable NGO collaboration platform enabling resource sharing, volunteer coordination, and project discovery.
- Integrated interactive geospatial mapping using Leaflet for location-based NGO and project visualization.
- Built realtime communication workflows with Socket.io for volunteer coordination and request management.
- Designed modular backend APIs for project management, user authentication, and resource tracking.
- Implemented responsive dashboard architecture with role-based access and dynamic project filtering.

SpeedoBits — Cloud-Based Code Editor SaaS | React, Tailwind CSS, Firebase

- Developed browser-based code editor SaaS platform with responsive workspace and modern developer-focused UI.
- Integrated Firebase Authentication and cloud persistence for secure user sessions and realtime project saving.
- Built modular editor architecture supporting multi-file management and scalable frontend state handling.
- Implemented responsive Tailwind-based interface optimized for productivity across desktop and mobile devices.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL

Frontend: React.js, Next.js, Tailwind CSS, Redux Toolkit, Framer Motion, shadcn

Backend: Node.js, Express.js, REST API Design, Authentication Systems, Webhook Integration, Rate Limiting

Database & Storage: MongoDB, Firebase, Redis, Appwrite

Realtime & Networking: Socket.io, WebSocket

DevOps & Cloud: Docker, GitHub Actions

Security: JWT, OAuth 2.0, Secure Cookies, bcrypt, Input Validation, Transaction Safety

Developer Tools: Git, Postman, Linux, Monaco Editor, VS Code API Integration

CERTIFICATIONS & ACHIEVEMENTS

- Selected among finalists in Pears Global Hackathon 2025 organized by Geek Room × Pears Global.
- Participated in VIBE-A-THON AI Hackathon focused on building AI-powered MVP applications.
- Completed Software Development Internship at Exposys Data Labs with practical exposure to software engineering workflows and project development.
- Participated in Galgotias international Hackathon (GIH) focused on building AI-powered MVP applications
